How to Make Use of Professional Development:
From Research to Job Placement

Intended for Math and Math related majors!

Rose McGinnis is the Director of Student Professional Development and Undergraduate Research for CST. She works with students to develop skills that are necessary for the job and research market. These may include developing a resume, determining career objectives, strengthening interview skills and even getting placed in an internship. She will be giving a talk aimed at Math and Math related majors describing opportunities and techniques specific to our field. Highly recommended for all Math majors, especially if you have no yet begun to think about what you are doing after graduation!

When: Wednesday October 2nd at 3pm
Where: Wachman Hall Room 617
Pizza after the Presentation!
